

## **Eva Schito**

### **PhD**

Research fellow in thermal science and energy systems at DESTEC - University of Pisa. She received her PhD degree in 2017 defending the Thesis “Methods and tools for a rational and efficient use of energy in museum buildings”. Since September 2017, she teaches for the class “Energy saving” (20 hours) in the Energy Engineering Master program and she has co-supervised 7 Master thesis in Energy Engineering. She has also taught for many webinars and workshops on “Energy Audit” and “Energy Certification”.

Her post-doc activities include research on renewable energy sources, their integration in the building sector, dynamic modeling of buildings and HVAC systems, together with the development of new strategies and method to improve efficiency in HVAC systems. Other topics are: energy efficiency in historic buildings and museums, human comfort, energy audit of buildings.

For her work, she cooperates with other universities (both Italian and European), research institutions (ENEA) and private companies.
